Distance Ed Course Offerings
Summer 2018  05/22/18 - 08/09/18

Session 1: 5/22/18 - 6/28/18
Session 2: 7/2/18 - 8/9/18

Delivery Format Key

**CL = Classroom LIVE**
An integrated, web-based virtual environment that delivers programs in real time following the on-campus schedule from classrooms on Lehigh’s campus to students in their homes, at their workplace, or while traveling. These classes do require live participation and discussion and are also archived for later review.

**OL = Online**
An asynchronous online format that offers flexible scheduling and participation. A 3-credit online course includes approximately 36 hours of content and assignments. Each online course requires an additional $100 online fee.

**HY = Hybrid**
A combination of both Classroom LIVE segments and asynchronous online segments. All DE students are required to connect in real time for the Classroom LIVE sessions, dates of which will be determined by the instructor.

**IS = Independent Study**
Delivery requires contact with advisor to arrange a project or research.

Course Registration

Only officially admitted students are eligible to register for Lehigh University courses for academic credit.

All DE students will register online via Lehigh’s campus portal, using their alternate pin. Students must have department approval for their course selections.

Tuition

Tuition rates below are per credit hour.
All courses with OL and HY delivery formats are subject to $100 support fee per course.

- **Arts and Science Courses:** $955 per credit (plus $100 support fee if OL/HY delivery format)
- **Business Courses:** $1,075 per credit (plus $100 support fee if OL/HY delivery format)
- **Engineering Courses:** $1,500 per credit (plus $100 support fee if OL/HY delivery format)
- **Healthcare Systems Engineering Program:** $1,500 per credit (plus $100 support fee if OL/HY delivery format)
- **Management Science and Engr. Program:** $1,500 per credit (plus $100 support fee if OL/HY delivery format)

Please click on the individual course Number/Sec fields to see the full Course Descriptions including:

- Course description
- Prerequisites
- Equipment or software requirements
- Attendance requirements
- Special course dates
- Textbooks

Students should note there may be elective courses outside their program area that fit curriculum requirements. Students should review all course offerings, prerequisites and seek Program Advisor's approval if interested in a course outside their program area.

When printing document, please adjust page range and print orientation if you only want to print the course list without all of the course descriptions.

Demand and Supply Chain Planning

Course Numbers: GBUS 432-D10

Prerequisites: none

Instructor - Phillip Coles psc208@lehigh.edu

Students will learn how businesses work with other businesses to build relationships and integrate demand and supply planning activities across the supply chain to deliver value to customers. They will learn about tools and technologies enabling integration, and the critical drivers and key metrics of supply chain performance.

Additional Course Requirements:

Special Topics: Polymer Coatings

Course Numbers: MAT 492-D11 OL

Prerequisites: none

Instructor - Eric Daniels  (610) 758-6355  Eric.Daniels@Lehigh.edu

Special Topics- Polymer Coatings will provide a survey of the various types of polymer coatings that are employed both in the consumer as well as the industrial marketplaces. Topics in the course will include a short discussion of the methods used to synthesize the polymer binder in a coating, what components are included in a coatings formulation, and how the various components interact with one another. Lectures will also include the various methods used to apply a coating to a particular substrate, characterization methods for various types of coatings, coatings properties, and a wide ranging discussion of the various types of polymer coatings applications such as architectural paints, wood coatings, electrodeposition for automotive coatings, can coatings, paper coatings etc. When the course is complete, the student will have a wide ranging understanding of polymer coatings and their many application areas.

Additional Info:
Strategic Supply Management

Course Numbers: GBUS 450-D10

Prerequisites: none

Instructor - Michael Tyler             mtyler@eversontesla.com

A course designed to introduce the MBA/MSE student to the vital role played by supply management in today’s global economy. The structure of the course includes a framework that shows how leading firms create competitive advantage from supply management. Topics covered include measurement, organizational design, human resources, information systems, longer-term contracting, supplier relationship management, cost management, early supplier involvement, global sourcing, and the formation of supply alliances. The course consists of lectures, web-based discussion, current readings, and case analysis.

Additional Course Requirements:

Some classroom LIVE sessions required (TBD). There will be a link to the Collaborate software download on the Course Site page.

Link to Lehigh Bookstore
Fracture Mechanics

Course Numbers: MECH 413-D10 OL

Prerequisites: MATH 205, MECH 305 or equivalent course in advanced mechanics of materials.

Instructor - Herman Nied       (610) 758-4128   hfn2@lehigh.edu

Elementary and advanced fracture mechanics concepts; analytical modeling; fracture toughness concept; fracture toughness testing; calculation of stress intensity factors; elastic-plastic analysis; prediction of crack trajectory; fatigue crack growth and environmental effects; computational methods in fracture mechanics; nonlinear fracture mechanics; fracture of composite structures; application of fracture mechanics to design.

Additional Course Requirements:
none specified

Equipment / Software Requirements:

MATLAB, C and/or Fortran compilers, ANSYS, and specialized finite element software. Students will be provided with application access by course instructor.

Access to MATLAB is available to distance education students by using Lehigh's Virtual Public Site

Notes:

Textbooks:
Polymer Nanocomposites

Course Numbers: MAT 486-D10 OL

Prerequisites: An introductory polymer course (MAT 204 or MAT 393) or consent of the department chair.

Instructor - Prof. Raymond Pearson (610) 758-3857 rp02@lehigh.edu

Synthesis, morphology and properties of polymer nanocomposites. Comparisons with traditional particulate composites will be made and models predicting properties will be emphasized. Melt viscosity, mechanical properties, barrier properties and flame retardancy will be discussed.

Additional Course Requirements: none specified

Equipment / Software Requirements: none specified

Notes: (May be continued on next page)

Sales Management

Course Numbers:  GBUS 467-D10

Prerequisites:  MBA 404 or with Instructor's permission.

Instructor - Prof. Steven Savino  (610) 758-5342  sls209@lehigh.edu

This graduate level course takes an integrated approach to the study of sales management, including the formulation of strategically sound programs, implementation of selling initiatives and the evaluation and control of the organization’s sales activities. Illustrative topics include the role of the sales manager in the divergent demands of multiple constituencies; the development of effective sales organizations; the salesperson's motivations and the development of flexible motivational and incentive plans; the variety of financial and non-financial rewards used by sales managers; forecasting sales volume, revenues and costs and evaluating performance by salesperson, territory, customer-type, market-type, and industry; and the coordination of the sales activities with other elements in a firm's marketing program. Learning methods include case studies whereby students' are challenged in their ability to diagnose and address diverse problems and decisions that arise in developing and implementing a firm’s selling strategy. Specific attention will be focused on building, measuring and managing a firm’s sales plan. The course will be a combination of lectures, discussions, case analyses and group exercises.

Advanced Fluid Mechanics

Course Numbers: ME 430-D10 OL

Prerequisites: Undergraduate courses in fluid mechanics and differential equations.

Instructor - Prof. Charles Smith (813) 909-2047 crs1@lehigh.edu

This course is a first graduate course in incompressible fluid mechanics, providing a broad coverage of key areas of viscous and inviscid fluid mechanics. Topics covered include: Flow kinematics, differential equations of motion, viscous and inviscid solutions, vorticity dynamics and circulation, vorticity equation, circulation theorems, potential flow behavior, irrotational and rotational flows, simple boundary layer flows and solutions, and real fluid flows and consequences, including aerodynamic drag and lift, and basic effects of turbulence.

Additional Course Requirements:

Equipment / Software Requirements:

Must have access to a scanner, and ability to scan material to pdf files.

Mechanical Behavior of Polymers

Course Numbers:  MAT 482-D10 OL

Prerequisites:  none

Instructor - Prof. Raymond Pearson  (610) 758-3857  rp02@lehigh.edu

A treatment of the mechanical behavior of polymers. Characterization of experimentally observed viscoelastic response of polymeric solids with the aid of mechanical model analogs. Topics include time-temperature superposition experimental characterization of large deformation and fracture processes, polymer adhesion, and the effects of fillers, plasticizer, moisture and aging on mechanical behavior.

Elements of Biochemistry I

Course Numbers: BIOS 371-D10 OL

Prerequisites: One year of organic chemistry

Instructor - Prof. Michael Behe  (610) 758-3474  mjb1@lehigh.edu

A general study of carbohydrates, proteins, lipids, nucleic acids, and other biological substances and their importance in life processes. Protein and enzyme chemistry are emphasized.

Additional Course Requirements:
Permission required for non CAS students.

Project Management Fundamentals

Course Numbers:  PMGT 409-D10

Prerequisites:  none

Instructor - Jody Rennie  jvr208@lehigh.edu

Introduction to project management - survey of the knowledge areas and approaches to managing projects. Looks at the relationship of projects to organizational strategy and culture, how to initiate a project, principles of planning and project execution and control, managing stakeholders, and communicating effectively. A review of the competencies required to address the complexities and challenges of projects. Hands-on approach to developing project management work artifacts and simulated project management game are used.

Additional Course Requirements:
none specified

Equipment / Software Requirements:
none specified

Notes:

**Course start date: 7/10 - 8/9
Course meeting dates: Tues/Thurs from 6 to 9 pm.  2 makeup sessions: Friday, 7/13 and Friday, 7/27
